**Proposed Amendment for Discussion**

1. (Proposed Amendment) A container configured for replaceable coupling to a phototreatment device having an indicator detector system, comprising:
  - a container housing defining at least one compartment therein;
  - a substance contained in the compartment;
  - a container connector for coupling the container to the phototreatment device;
  - the housing and the compartment being capable of coupling to a the phototreatment device to permit communication between the container and the device; and
  - an indicator coupled to the container, wherein the indicator is capable of being detected by the detector system so as to determine an aspect of at least one of the container and the substance.
